Top 250
Aerial Photography

Upload maps*, routes and tracks from Memory-Map on your PC. Share routes and tracks by email to use with Memory-Map or on your favourite route sharing site

Compatible with iPhone 3G, 3GS, 4 and iPad. iOS4 recommended.

* iTunes upload only available on iOS4. Upload of existing V5 maps not available with Memory-Map FREE.

Using Memory-Map Apps with Digital Map Shop

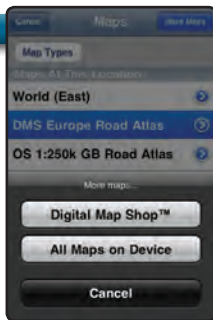

1 The first time you launch the App Memory-Map will automatically download a basemap for your current location.

 **2** To download additional FREE basemaps tap the map folder icon, followed by the **More Maps** button and select **Digital Map Shop**.

3 Tap **Map Types** to toggle on /off the Basemap, Road and other map categories you want to view. Tap **Done**.

4 The map list will show available maps at your current location, or at the location you were viewing in step 1, sorted by scale. Download the FREE 0.1:250k GB Road Atlas to use as your basemap.

5 Scroll around until you find the area of the country you want, or find a place by name using . Use  to zoom in on the map.

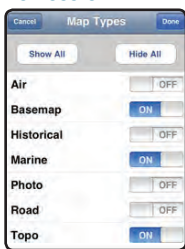

Downloading maps with Digital Map Shop

6 Repeat Step 3, selecting this time the map you have purchased or want to purchase credit for.

Existing Memory-Map Users: Sign in with your Memory-Map username and password.

New Users: Create an account and make a note of your username and password.

7 A pixellated map will appear on screen. Tap '**Activate**' top right. If you have already registered your serial number (on the reverse of your installation instructions) on your PC check your map selection and the km² area in the **Activate** window. This amount of area will be deducted from your Digital Map Shop Credit for this type of map.

8 If you have not yet registered the serial number tap '**Register Serial Number**' and enter the details. Back in the **Activate** window make sure you have purchased enough credit for the area shown on-screen and click **Activate**. Download of the map area will begin.

NOTE: Your serial number gives you the same amount of map credit for your PC and for one mobile device. eg, 5,000km² to download to your PC and 5,000km² to download to your mobile. You cannot upload Digital Map Shop maps from your PC to your iPhone / iPad - you must download the mapping separately following the instructions for each platform.

A-Z Maps: Download the whole map by viewing the entire city area on the basemap, repeat Step 3 and choose the A-Z map from the list.

Marine Charts: Activating a marine chart will download the whole of the chosen chart. Simply

select the chart from the list. Your licence allows you to download of all charts in the region individually, ie UK & Ireland.

IGN Maps: At Step 2, if you are in France, the IGN 1:1m basemap will autodownload. If you are in the UK, follow Steps 3-4 and download the FREE World (East) basemap, and repeat the steps to also download the IGN 1:1m France basemap. Then continue with steps 6-8.

Uploading V5 maps via WiFi

1) Uploading existing V5 maps requires the Memory-Map App and is not a feature available in the FREE App. After following Steps 1-5 above

2) Tap the map folder icon, followed by the **More Maps** button and select **Add maps via WiFi**. (If this option is not shown, you are using the FREE App and will need to purchase the full Memory-Map App.)

4) On your PC, open your web browser and enter the URL shown on your iPhone/iPad screen into the address bar (not the Search bar).

5) Follow the instructions on your PC screen to browse to the .QCT map file you want to upload to your iPhone / iPad. Maps are normally stored in your **C:\Maps_v5** folder on your computer.

NOTE: Maps cannot be bigger than 2GB in size. If you have a map larger than 2GB, like Great Britain 1:50,000 Landranger, use Memory-Map software on your PC to cut the map into 2 or 3 smaller sections for uploading. See the Memory-Map Knowledge Base for more information.

6) After upload is complete return to the **Map List**, tap **More Maps** followed by **All Maps on Device** to view all loaded maps. You can use the **Map Types** option to toggle on/off different map types to sort and search your loaded maps.

NOTE: Your maps licence allows for use on one PC and one mobile device (such as iPhone or iPad) only.

Uploading routes, tracks & marks

Routes and tracks can be uploaded by tapping  followed by 

Tap **Menu** and select '**Load data via WiFi**'. Follow the on screen instructions to upload your chosen Memory-Map Overlay (.mmo) files.
